- Assessed and improved service quality and performance metrics across different business areas.
- Collaborated with digital and business teams to define and assign roles and responsibilities for application support.
- Assist and implement approved solutions.

PROJECTS

Web Developing/ Creating a Website (Personal)   **2023-2023**
- Purpose: Building a portfolio website to introduce myself and my projects.
- Technology: HTML, CSS, Bootstrap, Figma.
- Result: Aesthetically pleasing website.

Core Competencies: UX design, Frontend Development, Creativity.

RateMyPeers, Peer Assessment application (Academic)   **Sept 2024-Dec 2024**
- Purpose: Create a Full stack application to enable students to provide feedback on their teammates' performance
- Technology: React, TypeScript, Vite, Tailwind CSS, Figma, GO, MongoDB, GitHub.
- Enables students to evaluate their peers based on four key performance criteria dimensions.
- Enables instructors to manage classes and teams while tracking a student's progress through a comprehensive dashboard.

Core Competencies: Agile Development, UX and UI Design, Full stack web development, Refactoring, Creativity, Problem analysis, Problem-solving, Debugging, Teamwork, and Communication.

Database Project (Academic)   **Sept 2024-Dec 2024**
- Purpose: Create and populate a database recording information about various soccer leagues from recent years.
- Technology: Python, pgAdmin 4, PostgreSQL, Neo4j, GitHub, Soccer API.
- It enables users to access a variety of statistics and trends in soccer from recent times years.

Core Competencies: ERD design, Refactoring, Problem analysis, Problem-solving, Debugging, Teamwork, and Communication.

File Processor Python (Academic)   **2023-2023**
- Purpose: Create a program to process a text file containing shapes and their respective measurements.
- Calculate the area, perimeter, eccentricity or inradius of the shapes.
- Implemented with Python inheritance, I/O, and ASCII art.
- This solo project resulted in a processor capable of extracting specific shapes from a text file and automatically calculating their respective geometric values.

Core Competencies: I/O, Inheritance, Problem-solving.

Simon Game (Personal)   **Dec 2023-Dec 2023**
- Purpose: Create a web application for the Simon game, a short-term memory game.
  This is a project from The Complete 2024 Web Development Bootcamp, instructed by Dr. Angela Yu.
- Technology: HTML, CSS, JavaScript, jQuery.
- Result: Fully functional Simon game with levels.

Core Competencies: HTML, CSS, JavaScript, jQuery, problem analysis and solving.

INTERESTS

Experience Abroad   Travelled to Spain in 2018 for a Soccer camp with the professional Valencia Club de Fútbol for 1 week.

Sports   Soccer, Hockey, Tennis.
